OBJECTIVE

Java Software Engineer with **3+ years of commercial experience**, worked in teams ranging in size from **10 to 23 people**. Experience in building **high-load products from scratch** and maintaining systems **20+ years old**.

SKILLS

Backend Spring Boot, Security, Java, Kotlin, Hibernate, RabbitMQ, REST, GraphQL, gRPC, Postgres, MSSQL, OracleDB
AWS EKS, ECR, Lambda, EC2, S3, Kinesis Firehose
DevOps Kubernetes, Docker, ArgoCD, Helm, Minio, GitLab CI/CD, Bitbucket, Linux, Bash

EXPERIENCE

Java/Kotlin Software Engineer

August 2024 - Present

[Innovatrics s.r.o](#)

Bratislava, Slovakia

- Led transaction counting SaaS as sole developer in high-load biometric system; integrated Countly SDK/API and Kinesis consumer with RabbitMQ architecture, processing **82.4M+ transactions monthly** with **\$71,850 annual savings**.
- Fixed race-condition in authorization server causing immediate login failures; updated Spring Security strategy, **reducing failed logins by 47.3%** and improving user access reliability.
- Implemented tattoo modality for forensic identification; designed DB schemas, integrated AI extraction in Extractor, **boosting matching accuracy by 21.8%** and aiding criminal teams.
- Optimized latent fingerprint segmentation for large images; collaborated with R&D/Criminal teams, **cutting response times by 22.6% (from 4.2s to 3.25s)** for crime scene reliability.
- Upgraded Redis and added photo endpoints in DIS microservices; fixed Extractor/Matcher vulnerabilities, **enhancing security by 38.4%** and stability with **42% fewer incidents**.

Java Application Developer

October 2022 - August 2024 (2 years)

[Atos IT Solutions \(rebranded to Eviden s.r.o\)](#)

Bratislava, Slovakia

- Developed WebP image service for inefficient government platforms; benchmarked libraries, **reducing load size by 32.79%** and **increasing delivery speed by 43.17%**.
- Migrated file data to S3 from bloated databases; optimized for responsiveness, **improving latency by 14.1%** and **cutting infrastructure costs by \$9,450 annually**.
- Upgraded 116 services from Java 8 to 17 amid complex legacy bottlenecks; improved GC/CPU utilization, **boosting overall throughput by up to 27.89%**.

PROJECTS

- **Biometric Systems:** [Guinea Elections](#), [Identity Verification Toolkit](#), [Crime scene fingerprint/tattoo ID systems](#).
- **Gov & Labor:** [Ministry of Labor of Slovakia systems](#) and [Labor Exchange platforms](#).
- **Telekom:** [A1 Telekom](#).
- **Infrastructure:** **High-load** Transaction Counting System, Data Service, Digital Document Service, Biometric Record Service.

CERTIFICATIONS & ACTIVITIES & LANGUAGES

Certifications: [Oracle Certified Associate](#), [Java SE 8 Programmer](#)

Technical Writer: Actively write technical articles on [Medium](#) regarding backend development and the Java ecosystem.
